PROFESSIONAL SUMMARY

Software engineering student specializing in **Full Stack Development** and **problem-solving**. Developed **MERN**-based projects and completed over **600 DSA problems** across various coding platforms.

EDUCATION

National Institute of Technology Hamirpur

Bachelor of Technology in Mechanical Engineering

2024 - 2028

CGPA : 7.94

- **Senior Secondary Education (Class XII)** - Percentage: **87.8%**
- **Secondary Education (Class X)** - Percentage: **86.4%**

PROJECTS

QuickLink | 🌐 Website 🌐 Github

- Reduced redirect response time by **87% (1000ms to 113ms)** through **non-blocking MongoDB** write optimization and indexed **shortCode** lookups.
- Developed a full-stack URL shortener featuring custom alias generation, **Firebase Google Authentication**, JWT-based authorization, and role-protected REST API endpoints.
- Created an analytics dashboard to track **5+ URL metrics**, including clicks, QR scans, unique visitors, device type, and link performance with per-user monitoring.
- Integrated QR code generation for every shortened URL and deployed using **CI/CD** on **Vercel** and **Render** with **MongoDB Atlas**.

Technologies / Tools Used : MERN Stack, JWT, REST API, data structures, algorithms

HillConnect | 🌐 Github

- Built a full-stack platform to connect users in remote hilly regions for sharing rides, tools, accommodation, and local resources, incorporating **data structures** and **algorithms** for efficient data handling.
- Developed a responsive frontend using **React.js** and scalable backend APIs using **Node.js** and **Express.js**.
- Designed and integrated **MongoDB** database and optimized the application as a **Progressive Web App (PWA)** for improved accessibility and performance.

Technologies / Tools Used : MERN Stack, PWA, data structures, algorithms

Attendify | 🌐 Website 🌐 Github

- Developed a full-stack **student attendance management system** with subject-wise tracking and real-time dashboards, emphasizing **software design** principles.
- Built responsive UI using **React (Vite)** with visual attendance summaries and percentage calculations per subject.
- Implemented efficient **CRUD operations** via **REST APIs** backed by **Node.js**, **Express.js**, and **MongoDB**.

Technologies / Tools Used : React, Vite, Node.js, MongoDB, software design

SKILLS

Databases :	MongoDB
Frameworks & Libraries :	React.js, Node.js, Express.js
Programming Languages :	C++, Python, JavaScript, HTML, CSS
Tools & Platforms :	Git, GitHub, GitLab, Postman, Vercel, Railway, Netlify, Canva
Core Concepts :	OOPs, REST APIs, Backend Development, Database Management

AWARDS & ACHIEVEMENTS

- Solved **600+** Data Structures and Algorithms problems across **LeetCode**, **GeeksforGeeks**, and **Codeforces**, demonstrating strong problem-solving consistency.
- Achieved a **LeetCode rating of 1600+**, reflecting competitive programming proficiency.
- Actively participated in multiple hackathons including **Hack 5.0**, **Electrothon 8.0**, **Rekathon**, and **Hack on Hills 6.0**, gaining hands-on team development experience.
